Right's Respecting School Article of the Week!

The Convention on the Rights of the Child brings together a range of rights that all children aged under 18 are entitled to, no matter who they are or where they are born. These rights ensure that all children are given the support they need to develop and reach their potential and are protected from harm. Governments across the world have signed up to the CRC and have promised to make the rights within the CRC a reality for children in their country and a number of articles specifically mention what governments must do to make rights happen.

Article 1 makes clear that everyone under the age of 18 has all the rights in the Convention.

Article 4 states that governments must do all they can to make sure every child can enjoy their rights by creating systems and passing laws that promote and protect children's rights.

Article 41 states that if a country has laws and standards that go further than the present Convention, then the country must keep these laws.
